

UNITED INTERNATIONAL UNIVERSITY
School of Business and Economics (SoBE)

BSECO Program

Course Outline: Microeconomics

Course Information	
School	School of Business and Economics (SOBE)
Department	Economics
Programme	BBA & BSECO
Name of Course	Microeconomics
Course Code	ECN 2111
Trimester and Year	Summer 2026
Pre-requisites	Mathematics for Business and Economics I
Credit Hours	3
Section	B
Class Hours	Saturday & Tuesday: 08:30 am - 09:50 am
Counselling Hours	Saturday & Tuesday- 09:51 AM to 11:10 AM; 12:31 PM to 1:50 PM Sunday & Wednesday- 09:51AM – 03:10 PM <i>*Other Hours: As per Appointment</i>
Class Location	Room no # 205
Instructor	Tanseer Ahamed
Contact	tanseer@eco.uiu.ac.bd
Office Room	Room # 335 (C)
Textbook	Principles of Economics, N Gregory Mankiw (7 th Edition), Southwestern, Cengage Learning
Reference Book	1. Microeconomics by Roger Arnold (Latest Edition) 2. Economics, Paul A. Samuelson and William D. Nordhaus, McGraw-Hill, Eighteen Edition (international)
Course Description	To provide a thorough introduction to economic theory. Starting from the basic ideas of tradeoffs, opportunity cost, and the benefits of trade, we will study how the market forces of supply and demand cause prices to be what they are. We will see the sense in which market economies are efficient, and the way governments can make our economy less or more efficient. We will delve behind the supply curve to see how firms choose their production levels to maximize profits,

	culminating in the model of perfect competition. Time permitting; we will look at market failures such as imperfect competition (monopoly and oligopoly).
Learning Outcome	After the successful completion of the course students will be able to: 1. Understand and apply the ten principles of economics. 2. Understand how comparative advantage provide the basis for gains through trade 3. Analyse changes in market demand and market supply in different real world situation and understand their impact on the equilibrium 4. Analyse the efficiency and equity implication of government interference in markets. 5. Compute and interpret the value of elasticity in different context 6. Evaluate the factors affecting firm behaviour, such as production and costs 7. Analyse the performance of firms under different market structures 8. Understand individual behaviour and how to optimize consumer choice based on constraints.
Teaching Methods	Lectures, PowerPoint, Assignment

Detailed Course Description

Class	Topics to be Covered	LOs	Reading Reference	Activities
1	Introduction		Chapter 1	
2,3	Economic Activities: Production and Trading		Chapter 2	
4,5	The Theory of Consumer Choice		Chapter 21	Quiz 1
6,7	The interdependence and gains from trade		Chapter 3	
8,9	The market forces of demand and supply		Chapter 4	
10,11	Consumer, producers and efficiency of the market Supply, Demand and Government policies		Chapter 6,7	Assignment 1
12	Review			Quiz 2
	Midterm Examination			
13, 14	Elasticity and its Application		Chapter 5	
15, 16	The cost of Production		Chapter 13	
17,18	Firms in competitive market		Chapter 14	
19,20	Monopoly		Chapter 15	Assignment 2
21,22,23	Monopolistic competition & Oligopoly		Chapter 16,17	Quiz 4
24	Review			
	Final Examination			

Assessment Policy

Assessment Types	Marks
Attendance and Participation	5%
